

Value Proposition for Mission Assurance

February 5, 2017

Todd M. Nygren
Systems Engineering Division
Engineering and Technology Group

Prepared for:

Space and Missile Systems Center
Air Force Space Command
483 N. Aviation Blvd.
El Segundo, CA 90245-2808

Contract No. FA8802-14-C-0001

Authorized by: Space Systems Group

Developed in conjunction with Government and Industry contributors as part of the U.S. Space Programs Mission Assurance Improvement Workshop.

Distribution Statement A: Approved for public release; distribution unlimited.

Acknowledgments

A special thank you for coordinating and orchestrating the survey goes to:

Greg Praino	Harris Corporation
Todd Fenimore	Lockheed Martin Corporation
Tammy Choy	The Aerospace Corporation
Jackie Wyrwitzke	The Aerospace Corporation

Responses to the survey were submitted by members of government and the aerospace industry. The authors wish to thank all contributors for their time and perspective in completing the survey.

Abstract

The 2016 Mission Assurance Improvement Workshop (MAIW) steering committee sponsored a “micro” topic to attempt to capture the value proposition for mission assurance (MA). A survey was conducted across the community on the perceived value and effort of mission assurance activities conducted across lifecycle phases using the mission assurance activities and phases defined in prior MAIW products. In all, 109 responses to the survey were received.

The value, effort, and efficiency results are presented as normalized heat maps. Population comparisons included the whole population compared to Class A mission population and the Government / Federally Funded Research and Development Center (FFRDC) population compared to the Contractor population. Other cuts of the data resulted in very small sample sizes. Observations based on heat map comparisons may identify areas for further investigation, but the results should not be the basis for action without further investigation and considerate evaluation of the specific situation.

U.S. Space Program Mission Assurance Improvement Workshop

Value Proposition for Mission Assurance

Micro Topic

Todd Nygren, The Aerospace Corporation

Greg Praino, Harris Corporation

Todd Fenimore, Lockheed Martin Corporation

January 3, 2017

Outline—Value of MA Topic

- Steering committee championed a micro topic that would consist of a survey to get at various perspectives of mission assurance value and effort across Industry, Government, and Support Contractors
- The planned output was a heat map showing the relative value-per-effort for common assurance activities across the lifecycle phases

Survey Approach

- What is the role and experience level of each respondent?
- What is the value of MA tasks in each program phase?
 - *High, medium, low, none, N/A*
 - *Used Mission Assurance Guide (Aerospace Report No. TOR-2007(8546)-6018 Rev B) for program phases*
 - *Used mission assurance tasks from Mission Assurance Framework (Aerospace Report No. TOR-2010(8591)-18)*
- What level of effort is required for each MA task in each program phase?
 - *High, medium, low, none, N/A*
- Efficiency calculated as ratio of value to effort

MA Info

Instructions: Please indicate your assessment of the EFFORT and VALUE (two assessments per line). Efforts are intended to represent the labor applied to that task relative to all Mission Assurance activities across the life of the program. If the task applies but no labor was expended, select "None." If the task does not apply, select "N/A."

	EFFORT					VALUE					No answer

Respondent Profiles—109 Complete Responses

- Government
 - *26 responses from 5 organizations*
 - 15 responses from Missile Defense Agency (MDA)
 - 8 response from NASA
- Systems Engineering and Technical Assistance (SETA)/Support Contractors
 - *23 responses from 13 organizations*
- FFRDCs
 - *12 responses*
- Prime Contractors
 - *45 responses from 8 organizations*
- Subcontractors
 - *2 responses from 2 organizations*
- Other
 - *1 complete response*

Additional Demographics

- Experience
 - From 1 to 59 years

- Mission criticality
 - 67 Class A
 - 23 Class B
 - 5 Class C
 - 3 Class D
 - 11 not identified
- Contract type
 - 47 Cost Plus
 - 36 Fixed Price
 - 26 not identified
- Respondent span of influence
 - 23 enterprise / multi-program / senior executive
 - 16 product / unit / module / assembly
 - 15 space vehicle / major ground system
 - 15 subsystem / assembly of units / integration lead
 - 14 program manager / major product line
 - 14 other
 - 12 piece part / sub-assembly

Value, Effort, and Efficiency Heat Maps

- The following slides include representations of the responses by larger groupings:
 - *All respondents together*
 - *Government and SETA contractors compared to Prime and Subcontractors*
- Value and effort maps show higher responses by color intensity
- Response counts do not allow detailed analysis into smaller groupings
 - *Requested broader Government and Industry involvement during MAIW*
 - *Extended survey to May 31 to gather additional responses*

Activities and Phases Used in Survey

- Activities—rows in the heat maps
Program Execution Processes
MA tasks (activities) taken from *Mission Assurance Framework* (Aerospace Report No. TOR-2010(8591)-18)
 - *Requirement Analysis and Validation (Req)*
 - *Design Assurance (DesAsur)*
 - *Parts, Materials, and Processes (PMP)*
 - *Environmental Compatibility (Env)*
 - *Reliability Engineering (Rel)*
 - *System Safety (SysSaf)*
 - *Configuration/Change Management (CCM)*
 - *Integration, Test, and Evaluation (ITnE)*
 - *Risk Management (Risk)*
 - *Independent Review (IndRev)*
 - *Hardware Quality Assurance (HWQA)*
 - *Software Assurance (SWAsur)*
 - *Supplier Quality (SupQA)*
 - *Failure Review Boards (FRB)*
 - *Corrective Action Boards (CAB)*
 - *Alert Processes (Alert)*
- Phases—columns in the heat maps
Phases taken from *Mission Assurance Guide*
(Aerospace Report No. TOR-2007(8546)-6018 Rev B)
 - *Concept Studies (ConStd)*
 - *Preliminary Design (PreIDes)*
 - *Complete Design (CompDes)*
 - *Procurement (Procur)*
 - *Hardware Fabrication (HWFab)*
 - *Software Code and Unit Test (SWCUT)*
 - *Integration and Test (InT)*
 - *Fielding (Field)*
 - *Operations (Oper)*

- For value, effort, and efficiency = value/effort
 - Built initial heat map of average of raw responses
 - Normalized by average (lower right) value in raw heat map (on left)
- In observations on value and effort, reordered by Pareto of activity (while retaining phase order for ease of comparison) and then by Pareto of phase (while retaining activity order for ease of comparison)

- Phase with highest value:
 - *Complete Design*
 - High value across multiple activities
 - *Integration and Test* was a close second
- Phase with lowest value:
 - *Concept Study*

- Activity with highest value:
 - *Requirement Analysis and Validation*
 - Requirement Analysis and Validation is high through late phases, indicating the persistent value of that activity
- Activity with lowest value:
 - *System Safety*

- Phase with highest effort:
 - *Complete Design*
 - High value across multiple activities
 - *Integration and Test was a close second*
- Phase with lowest effort:
 - *Concept Study*

- Activity with highest effort:
 - *Requirement Analysis and Validation*
 - Requirement Analysis and Validation is high through late phases, indicating the persistent value of that activity
- Activity with lowest effort:
 - *System Safety*

Observations for highest value are similar to observations for highest effort

- For value, effort, and value/effort
 - *Built initial heat map of average of raw responses*
 - *Normalized by average (lower right)*
- In observations, reordered by Pareto of activity and phase

Whole Population—Value/Effort = Efficiency Observations

- Phase with highest efficiency:
 - *Concept Study*
- Phase with lowest efficiency:
 - *Fielding*
- Activity with highest efficiency:
 - *Alert Processes*
- Activity with lowest efficiency:
 - *Environmental Compatibility*
- These are different than phases and activities identified in looking at value and effort separately
 - *Beware that small effort scores can inflate efficiency*
 - *High efficiency may indicate areas for in-depth review—high value for effort*
 - Alerts across most phases
 - *Low efficiency may indicate activity is not applicable to phase or ineffective processes or signal perception disconnects*

- Efficiency ordered by phase and activity for each population

Summary

- 2016 MAIW sponsored a micro topic to attempt to capture the value proposition for mission assurance
 - *A survey was conducted across the community on the perceived value and effort of mission assurance activities conducted across lifecycle phases*
 - 109 were responses received with extension of deadline to complete survey
 - *Value, effort, and efficiency results were presented as normalized heat maps*
 - *Population comparisons included:*
 - Whole population versus Class A mission population
 - Government/FFRDC population versus Contractor population
 - Other cuts of the data resulted in very small samples
- Observations based on heat map comparisons may identify areas for further investigation

Value Proposition for Mission Assurance
